OPSEC | Assess Risk Assessment

For When You Need More Insight

OPSEC | Assess provides cost-effective and time-efficient security assessments that offer insights comparable to traditional solutions. Risk is identified through security assessments and detailed gap analysis mappings to NIST and CIS frameworks. The digital dashboard offers detailed remediation recommendations that are easy to find and prioritize. myCYPR team members review evidence for accuracy, providing MSP-level engagement.

OPSEC | Assess Capabilities

Internal & External Vulnerability Assessment
Evaluates all live IPs, within and outside an organization, including those on site, in the cloud, or accessible from any other location.

Application Risk Assessment
Assesses the functional components of an organization's IT system, including any third-party software and applications.

Operational Maturity Assessment
Assesses an organization's cyber maturity, policies, controls, and incident readiness, including potential impact.

When to Chose OPSEC | Assess

VALIDATE vendor compliance

ONGOING vendor management

Implement corrective action

EXPAND OR CONTRACT vendor relationships

TERMINATE vendor relationships

OPSEC | Assess is Different

More Data, More Accuracy
Dig deeper than OSINT or even SAQ with a next-gen security assessment, detailed remediation instructions, and progress tracking.

Budget & Time Conscious
Offers a more cost and time-effective solution compared to traditional assessments, that offers equivalent insight.

Suitable for Third-Parties
Assess critical vendors or those handling sensitive data more in-depth, while selecting different assessment levels for other vendors.
